

**189 ENVIRONMENTAL, HEALTH, LABOR, AND SOCIALLY RESPONSIBLE
INVESTMENT ORGANIZATIONS CALL ON THE HOUSE OF REPRESENTATIVES TO:
SUPPORT THE PALLONE-SOLIS TOXIC RIGHT-TO-KNOW AMENDMENT
TO THE INTERIOR APPROPRIATIONS BILL**

May 17, 2006

Dear Representative:

On behalf of the 189 undersigned organizations, we urge you to vote yes on the Pallone-Solis Toxic Right-To-Know Amendment to the Interior Appropriations Bill. The Amendment will prevent the U.S. Environmental Protection Agency (EPA) from moving forward with a set of proposed changes to the Toxics Release Inventory (TRI). The EPA's changes would make it more difficult for citizens to track toxic pollution in their neighborhoods and take steps to reduce the impact on their family's health.

For 20 years, TRI has been an essential tool in alerting communities, workers, first responders, and public health officials to the presence of chemicals and has provided critical assistance in dealing with highly hazardous situations.

Weakening the TRI program, the EPA plans to:

1. Move from annual to biennial reporting, leaving a gap every other year during which companies could pollute as much as they want without reporting.
2. Allow companies to release ten times the amount of toxics before detailed reporting is required.
3. Create a first-ever exemption on reporting the most dangerous class of chemicals—Persistent Bioaccumulative Toxins (PBTs), like lead and mercury.

The TRI program has undoubtedly prevented many dangerous, and even deadly, chemical exposures and accidents. It deserves the protection that the Pallone-Solis Amendment would provide. Emergency responders, workers, public health officials, environmentalists, community residents, and federal and state officials routinely rely on TRI. From 1998 to 2003, TRI documented a 2.8 billion pound reduction in the annual release and disposal of toxic chemicals.

The changes would have minimal benefits for businesses. Small businesses are exempt from reporting to TRI, and reporting companies would still have to perform calculations to determine if they meet the new thresholds. General Electric stated that, "EPA's current proposal to expand applicability for Form A would not provide significant burden reduction."

Please preserve and protect the TRI program as it currently stands by voting yes for the Pallone-Solis Toxic Right-To-Know Amendment to the Interior Appropriations Bill.

Sincerely,
